**Subject:** Needed: FY20 "small p" Products for PFAS AOP Project

Hi all,

The AOP research area coordination team has been asked to reach out to Output Team contributors to propose FY20 products for Output Area AOP8 (revised to O-CSS26 as per latest version of the plan—attached).

The “ask” right now is for you to indicate “small p” products that you feel can be confidently delivered by September 2020. This shouldn’t be too bad to pull together, because it is information that you already have generated, but ultimately didn’t get included in the submitted planning document. Specifically, these are papers, software items, reports, etc., that you expect to have delivered (e.g., through STICS) by 9/30/2020.

What we would like are (a) short title; (b) 1-2 sentence description; (c) product type; (d) expect delivery date (i.e., Q1-Q4); and (e) product contact name/affiliation.

Of course, since we don’t have a final answer yet on FY20 RAP \$\$, it is understood that some of these proposed products will be contingent on funding coming through. Please don’t let that keep you from including them in this list. If anything, capturing those near-term deliverables that are contingent on CSS’s funding decisions can help demonstrate the necessities driving our budget requests.

Please respond by COB Thursday **August 22**. On your response **please include Jill** as my time in the office over the next couple weeks will be somewhat sporadic.

Thanks!

Gary
